MAQM is an outdoor ambient air quality monitor with a modular design and smart features. With ModbusRTU or ModbusTCP connection, it can be easily integrated into your existing BMS, PLC, SCADA system in your facility. With Wifi, Ethernet or NB-IoT version, it can connect to Globiots platform or any IoT platform for remote monitoring and data analysis. For Sigfox and LoRaWAN versions, customers can connect to Sigfox network or any LoRaWAN® Network Server. Customers can choose different types of sensors to integrate into the main device such as temperature, humidity, noise, PM1.0, PM2.5, PM10, NO₂...

This MAQM is used in office buildings, schools, hospitals, factories, warehouses, laboratories, construction sites... or any facility.

Applications Ambient Air Quality Monitor

Notes For Applications

MAQM-H1.JPG

Modular Design

Customers can choose from different measurement modules such as temperature, humidity, noise, PM1.0, PM2.5, PM10, and NO_2 ...

Multiple Connectivity

Supports many different connection standards such as LoRaWAN, Sigfox, NB-IoT, Cat M1, RS485, WiFi, and Ethernet

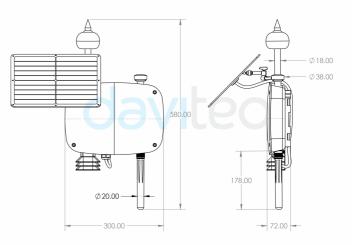

Support Solar Power

Use Solar panel together with rechargeable batteries

Outdoor IP66

Designed to be installed both indoors and outdoors
